

What I liked most during this unit was working with others in group projects and 1-on-1 discussions with another classmate. Working with others also helped me meet new people. Most of my other classes are not very conducive to meeting new people because there is basically no interaction between classmates. At first, I found it difficult to find which assignments I was supposed to complete and had to learn where to find the assignments is Canvas. I did end up learning where to find my assignments. What I believe helped me most in my analysis essay was peer editing with another classmate. This made me aware of how people other than myself interpret a message and I also enjoyed reviewing my partners essay as well. I think I will be able to use my analysis skills to analyze other messages I see in other classes and other mediums such as social media.
