I am forwarding your receipt to our department. Either Lauren or Wayne will let you know how to get reimbursement.

I wasn't able to test the old ESCs because the year prior, the rovers were dismantled and their parts were used by another group. As for the batteries, I measured the voltages and separated the good from the bad but did not write any of it down. These two areas for improvement were brought up to me by Prof. Thein. I took her word and made the ESCs based on that.

Is there any way I could be reimbursed out of the allotted \$100 for the PCB fabrication? I paid for it out of pocket and it cost \$101.75. I have a copy of the invoice.

Here is the second draft. I have completed all the sections now.

Thanks,

Nick
