

velocity.

17

1. the tension is ~~not~~ constant at  $W$ .
2. the tension is constant at  $W$ .
3. the tension is greater than the weight
4. the tension is less than the weight
5. the tension is less than the weight

# PHYS 407

6. the tension is greater than the weight

7. the tension is greater than the weight and is increasing

8. the tension is less than the weight and is decreasing

9. Yes

rite down any thought  
hat you came up with  
s, you will be asked  
If there are any test  
as well.  
of making observations  
ng your model as  
similar to the actual
