

HOW CONNECT AGATE VIA CLION AND VSCODE

YI Wang & Matt
Plumlee

CS515

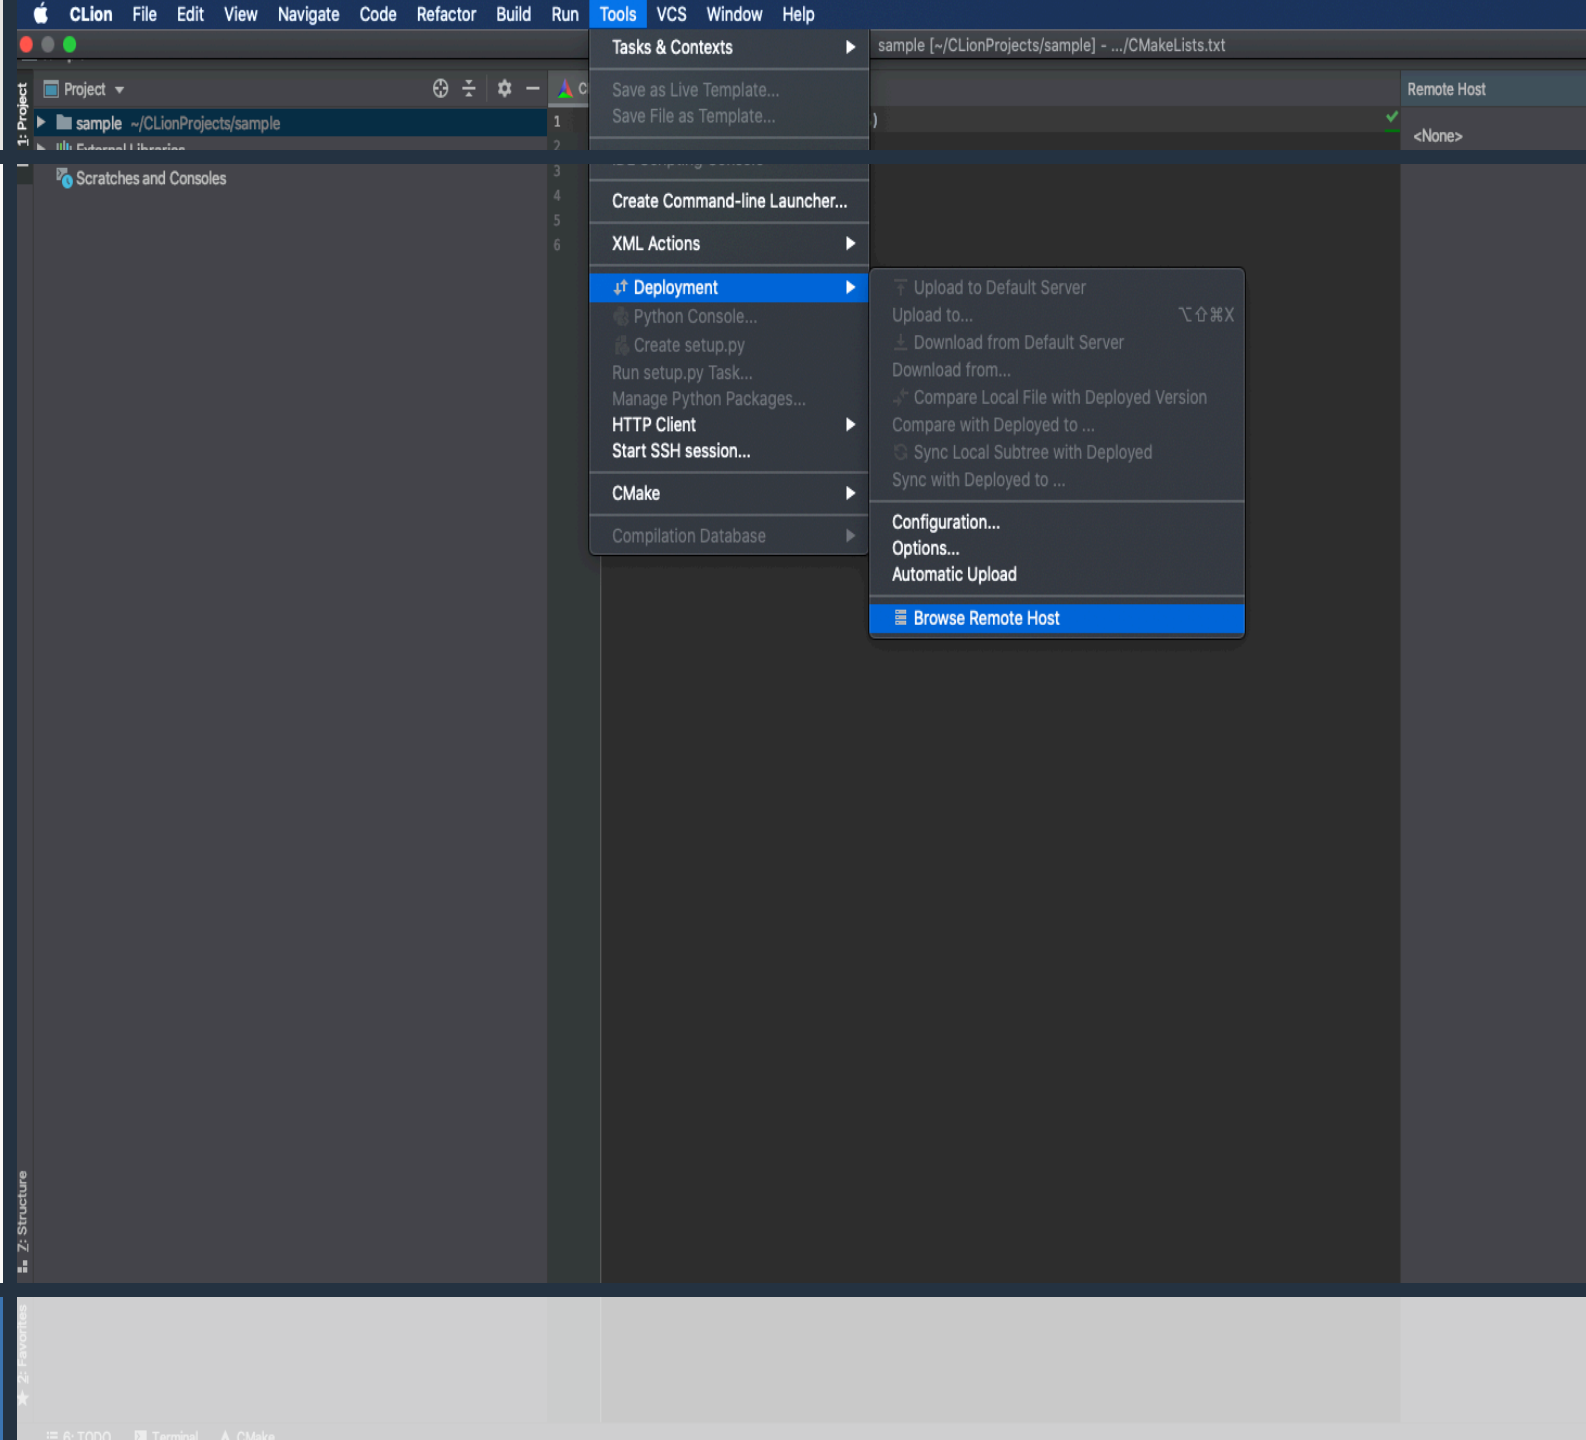

CLion

1.Download and install
CLion

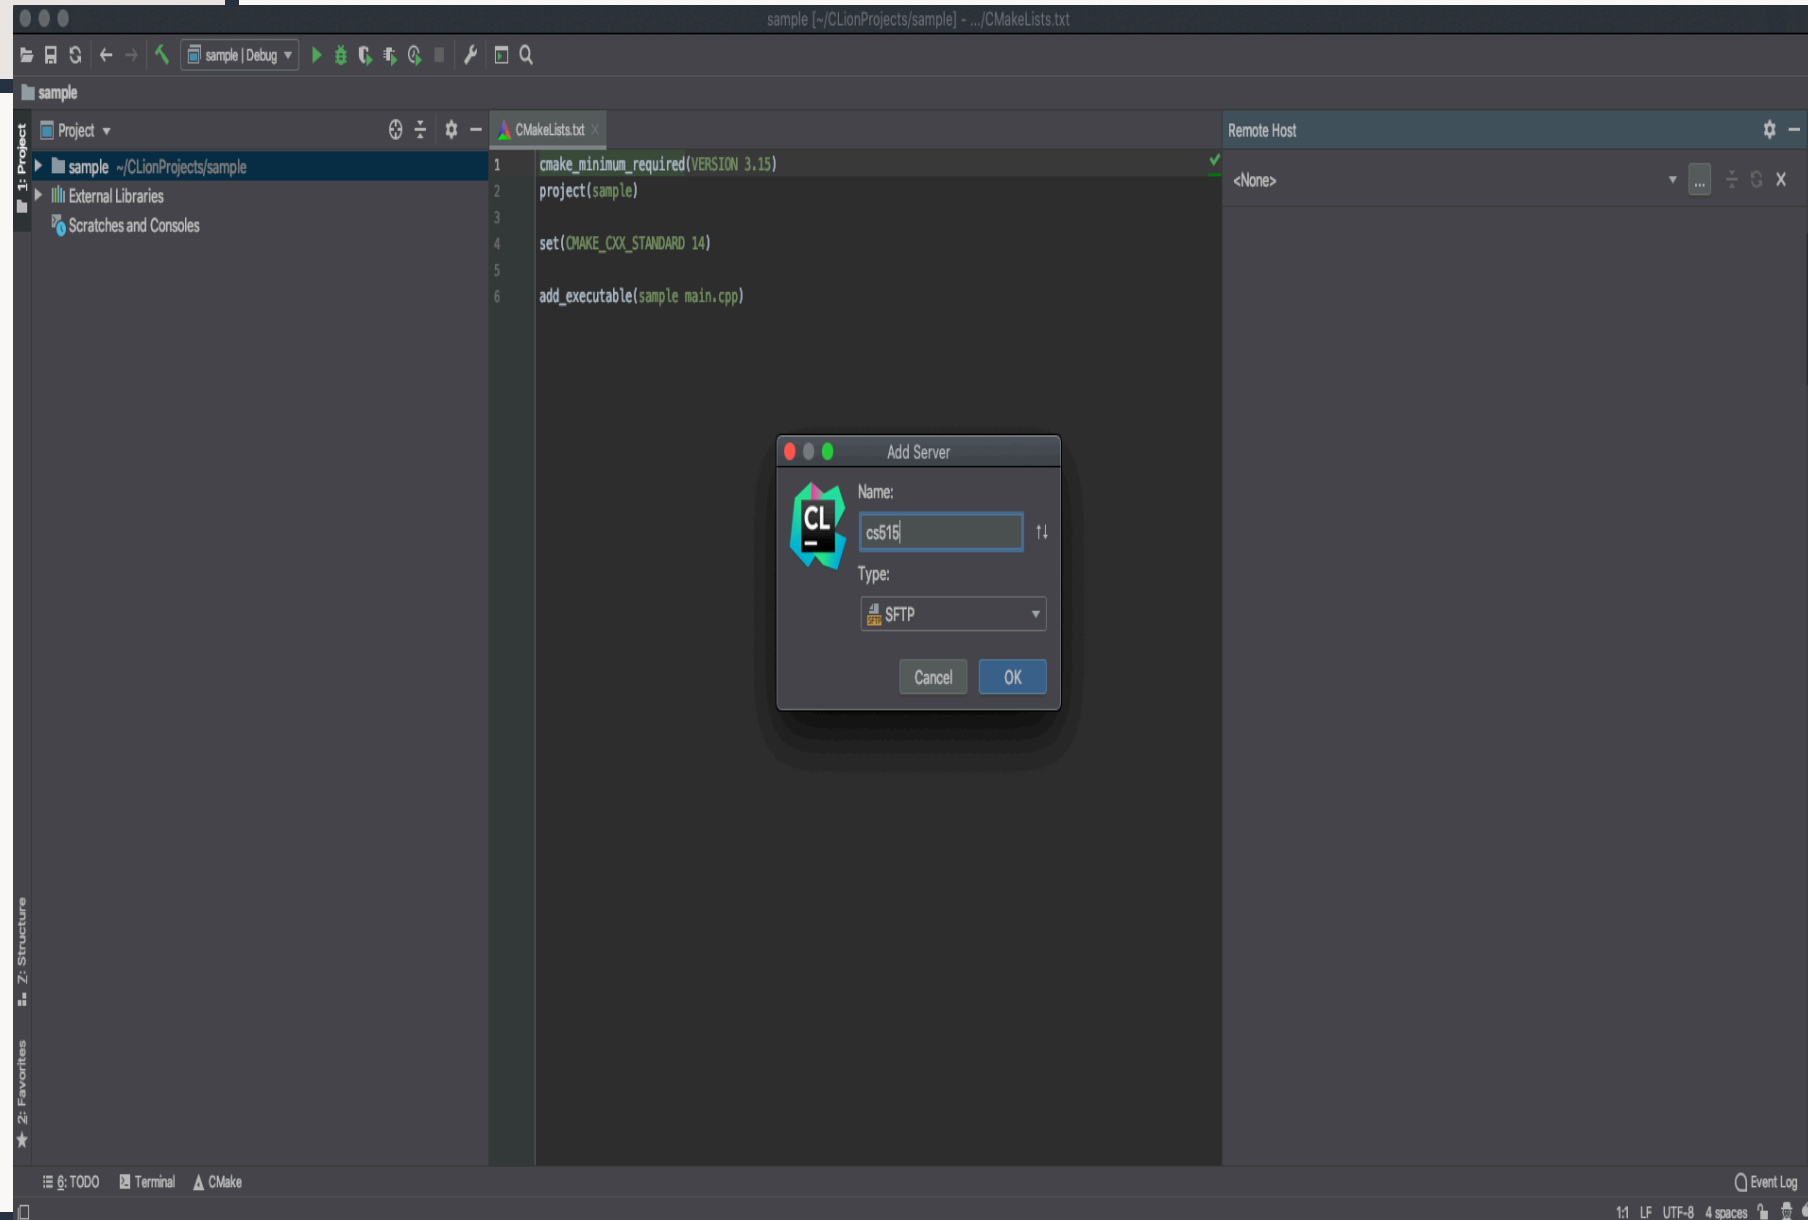

2.click the tools bar

3.Select deployment

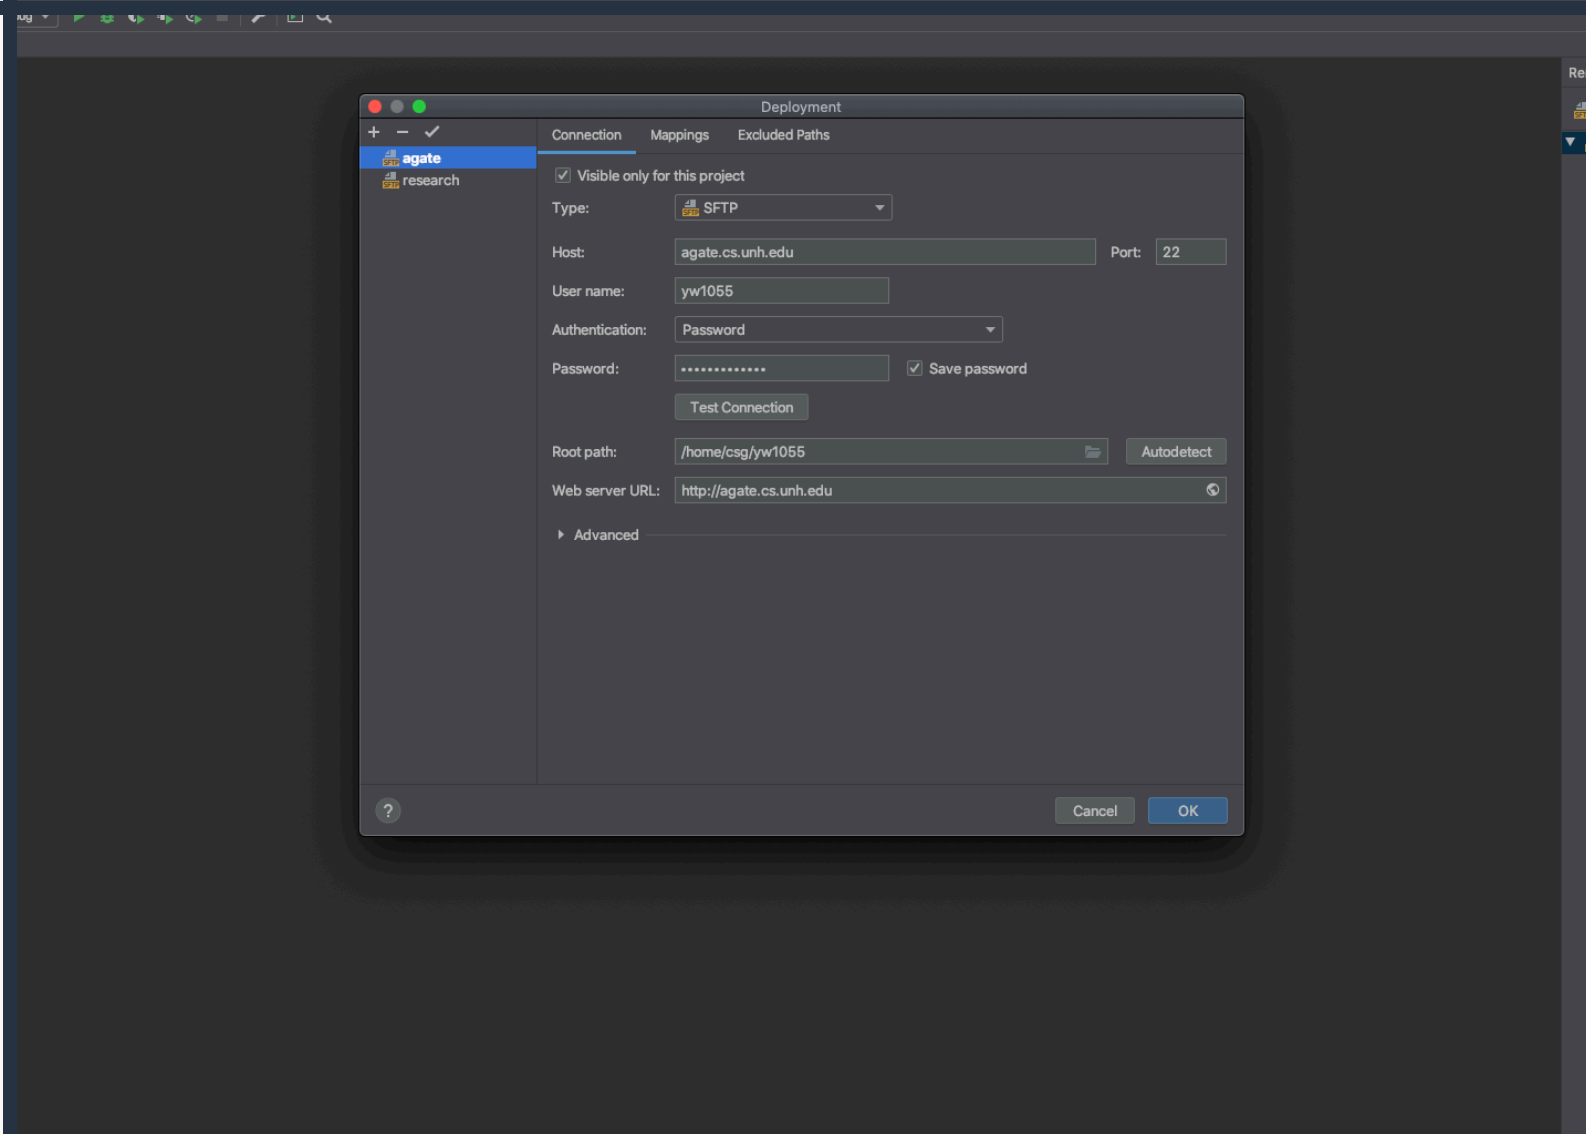

4.Select Browser
remote host

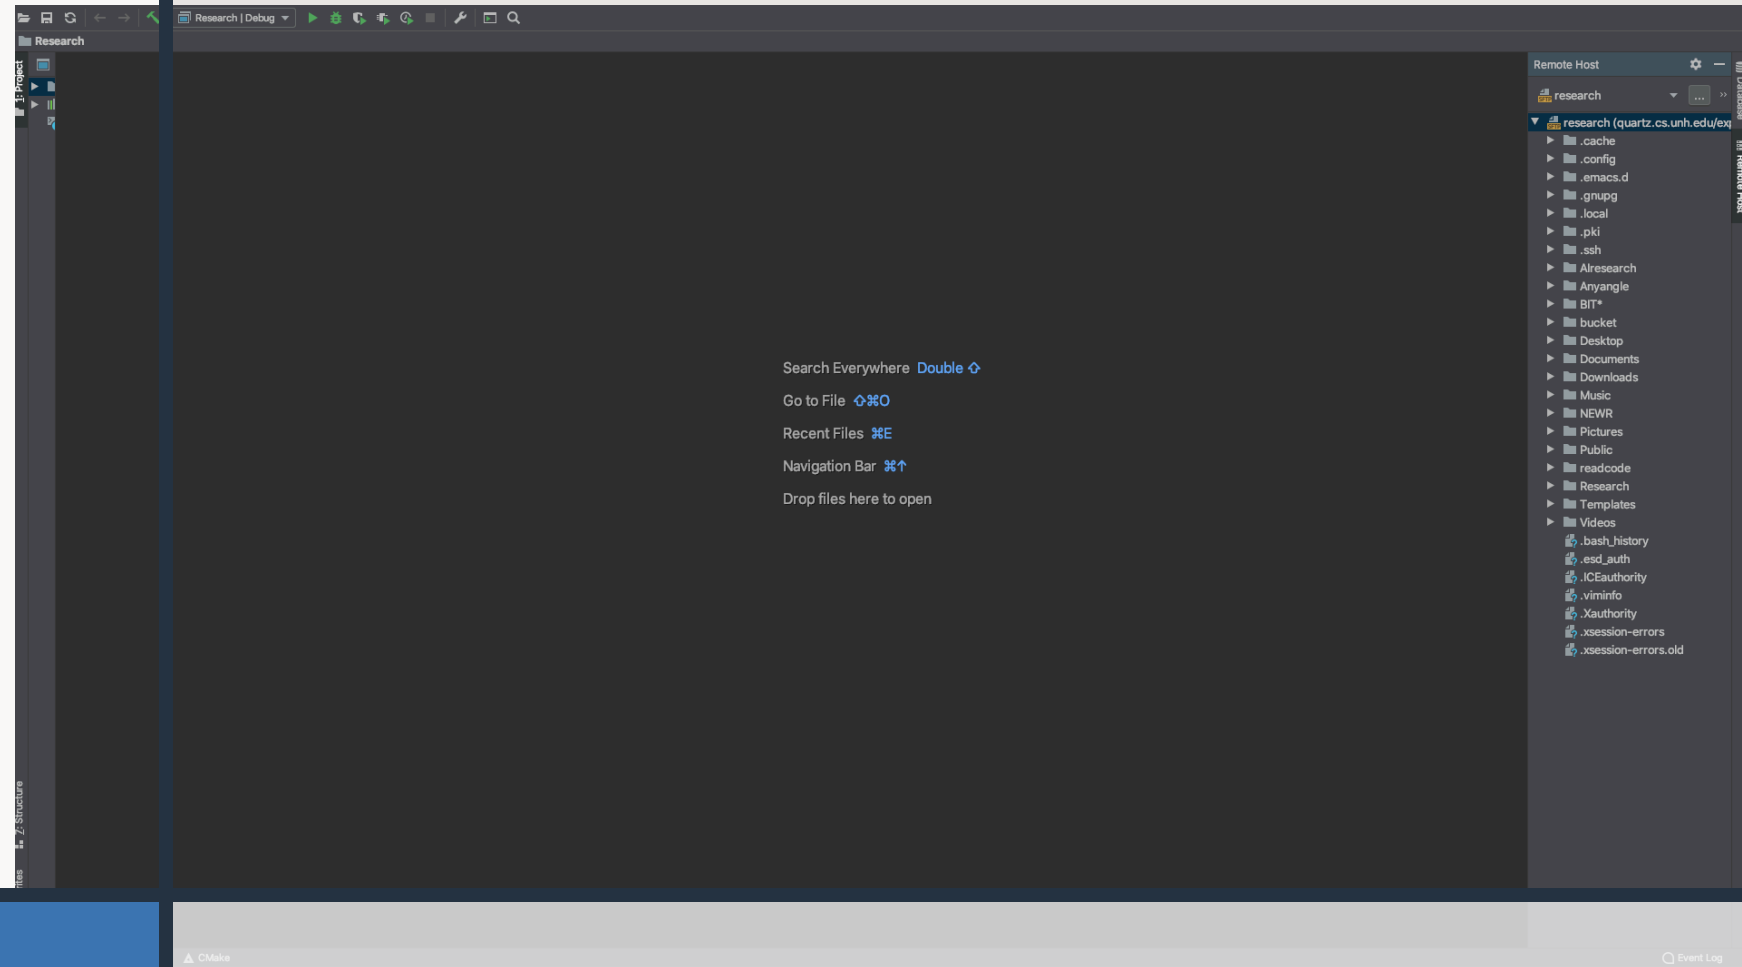

1. click the “...” icon at the right column
2. The interface will show up
3. SET name TO cs51
4. And select SFTP

1. Change the user's name to yours
2. For the root path:
csg: graduate students
csu: undergraduate
Port: 22/31415

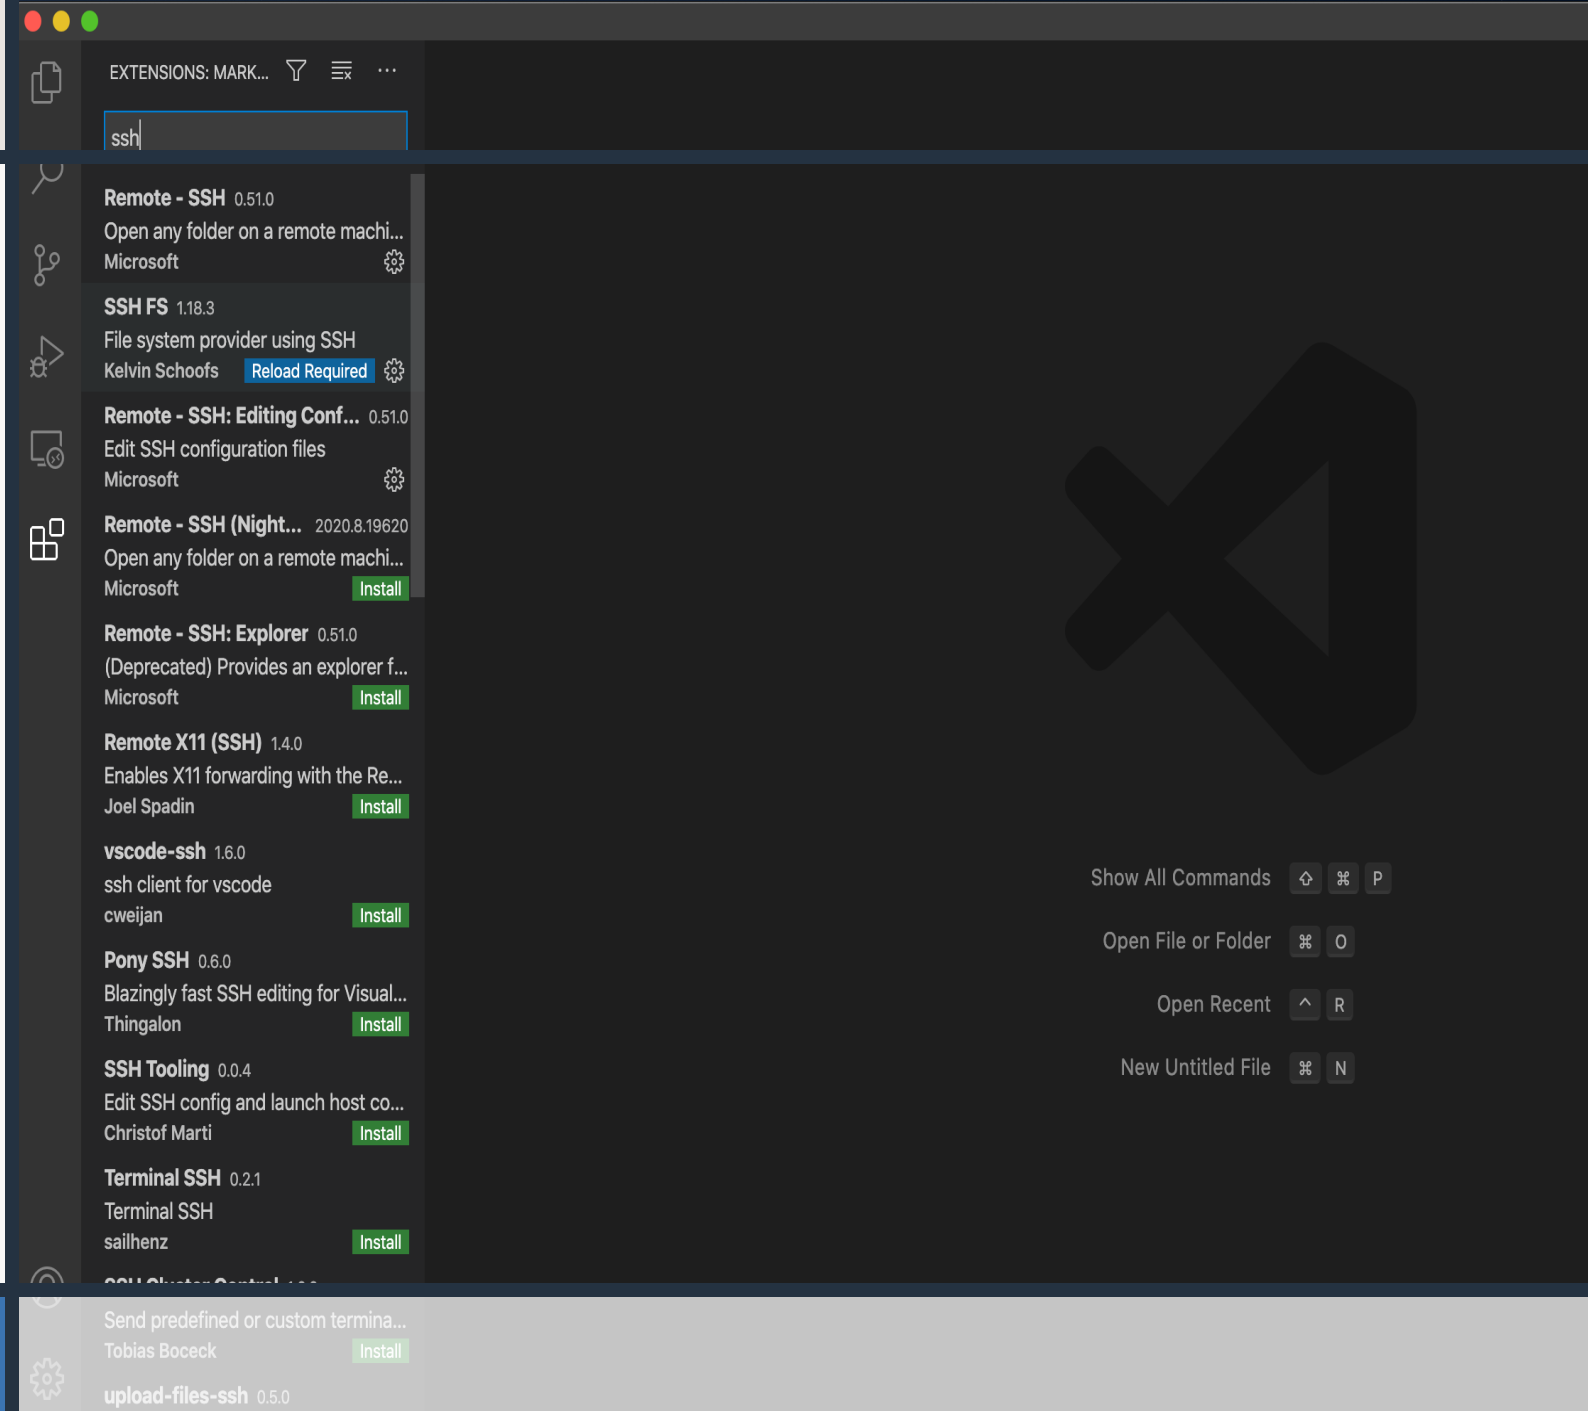

Look at the right column,
the workspace for your
agate is all set.

VS-code

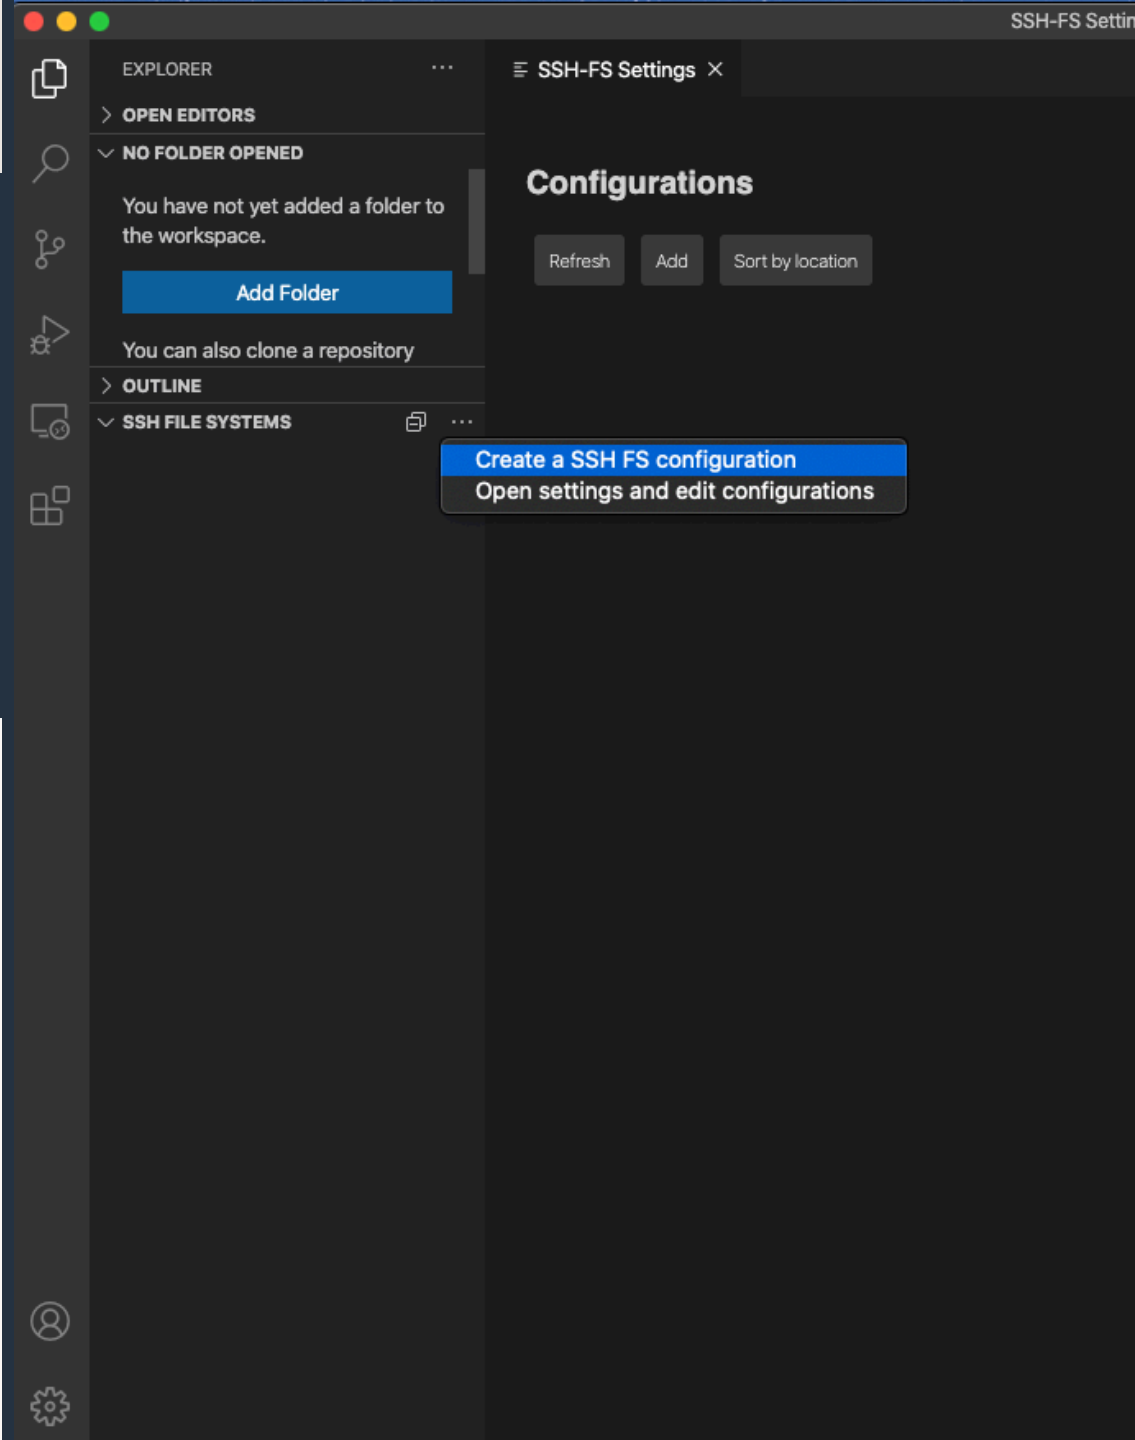

1. download VScode and install it
2. Click the extension sign, search and install SSH FS

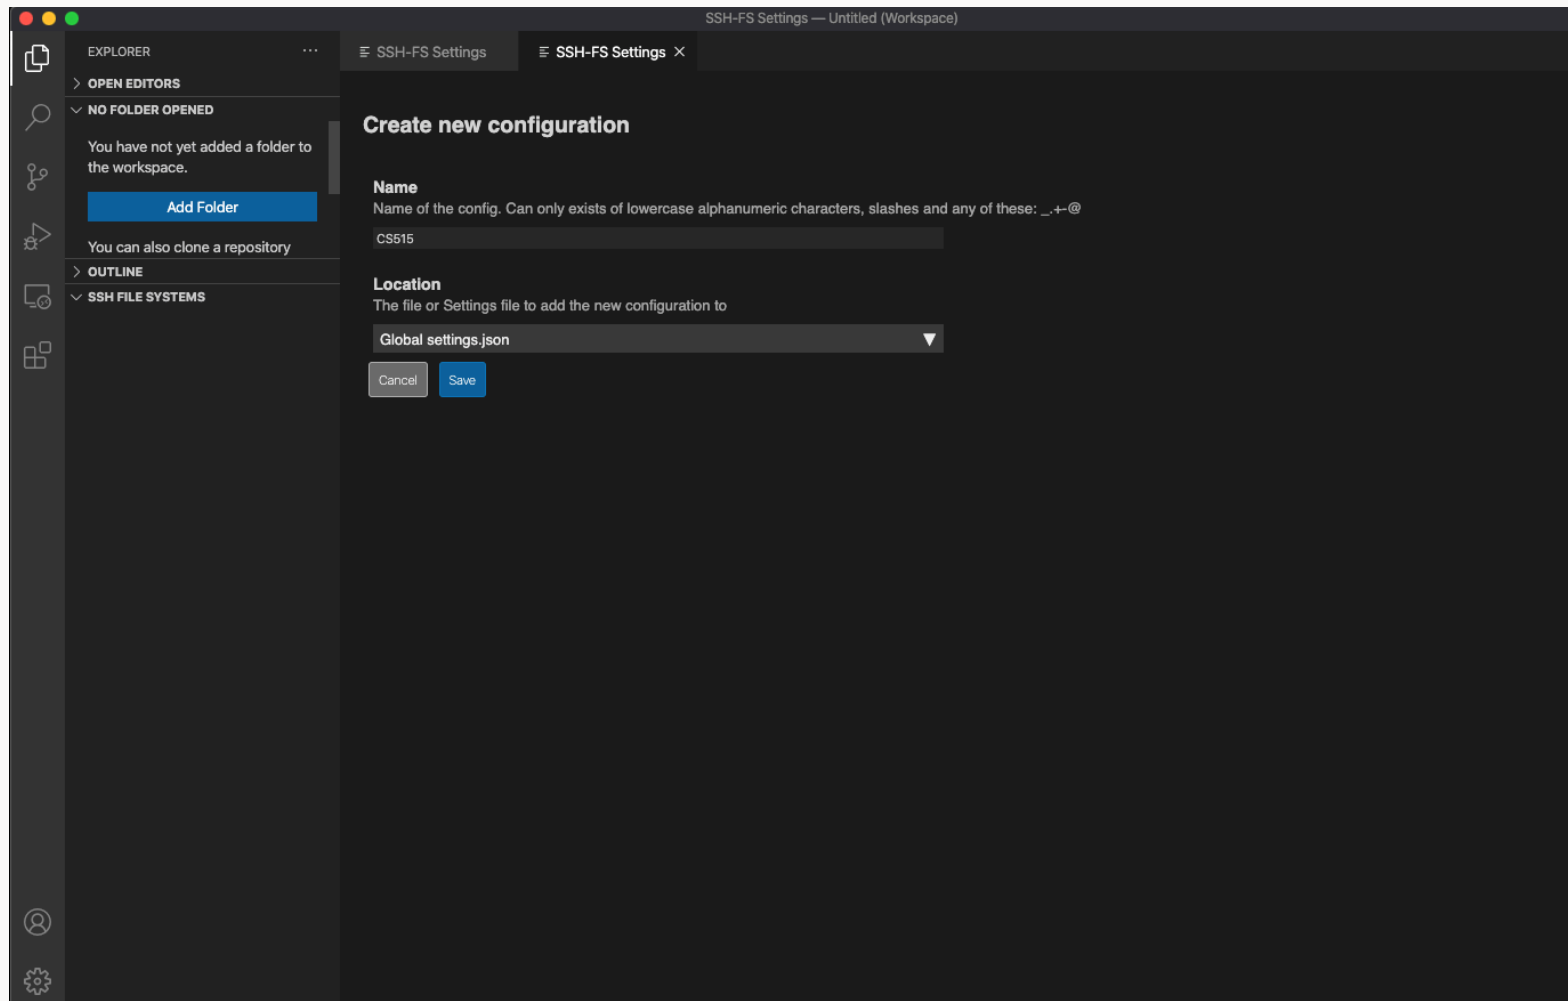

1. Click the “explorer” icon which is at the top left

2. Click “...” icon at the SSH FILE SYSTEM and then select “Create a SSH FS CONFIGURATION ”

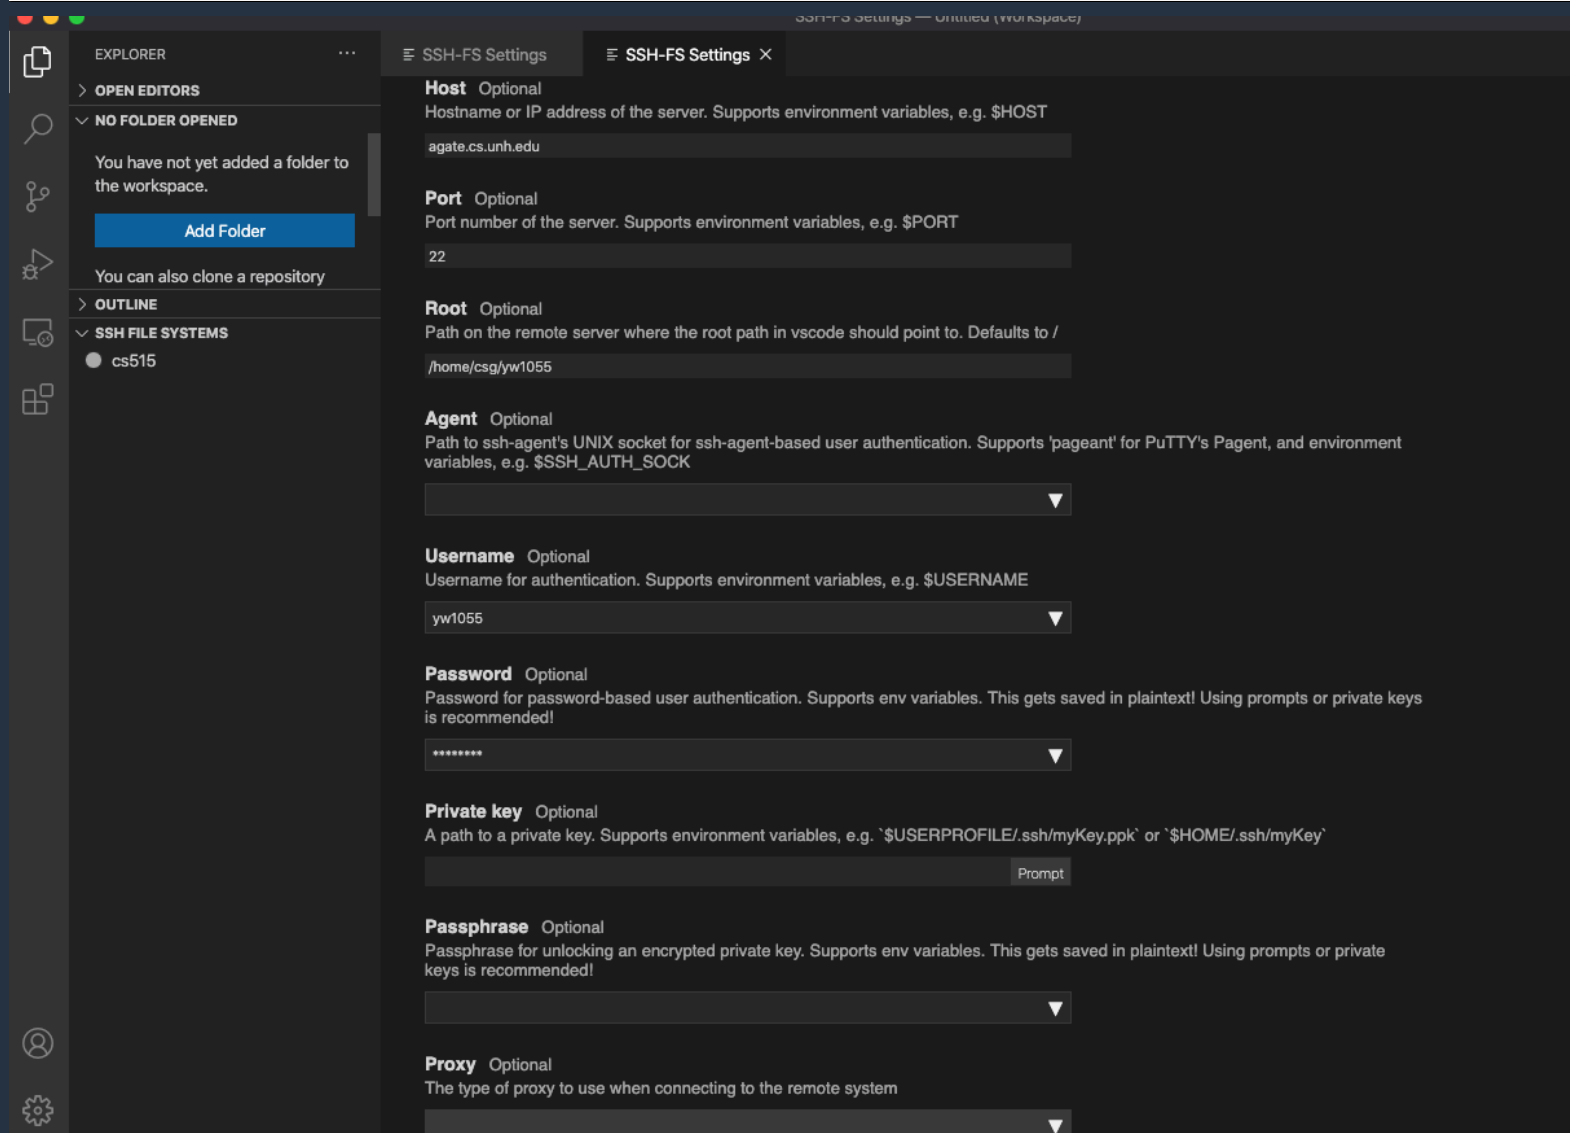

3. Then just gave a name

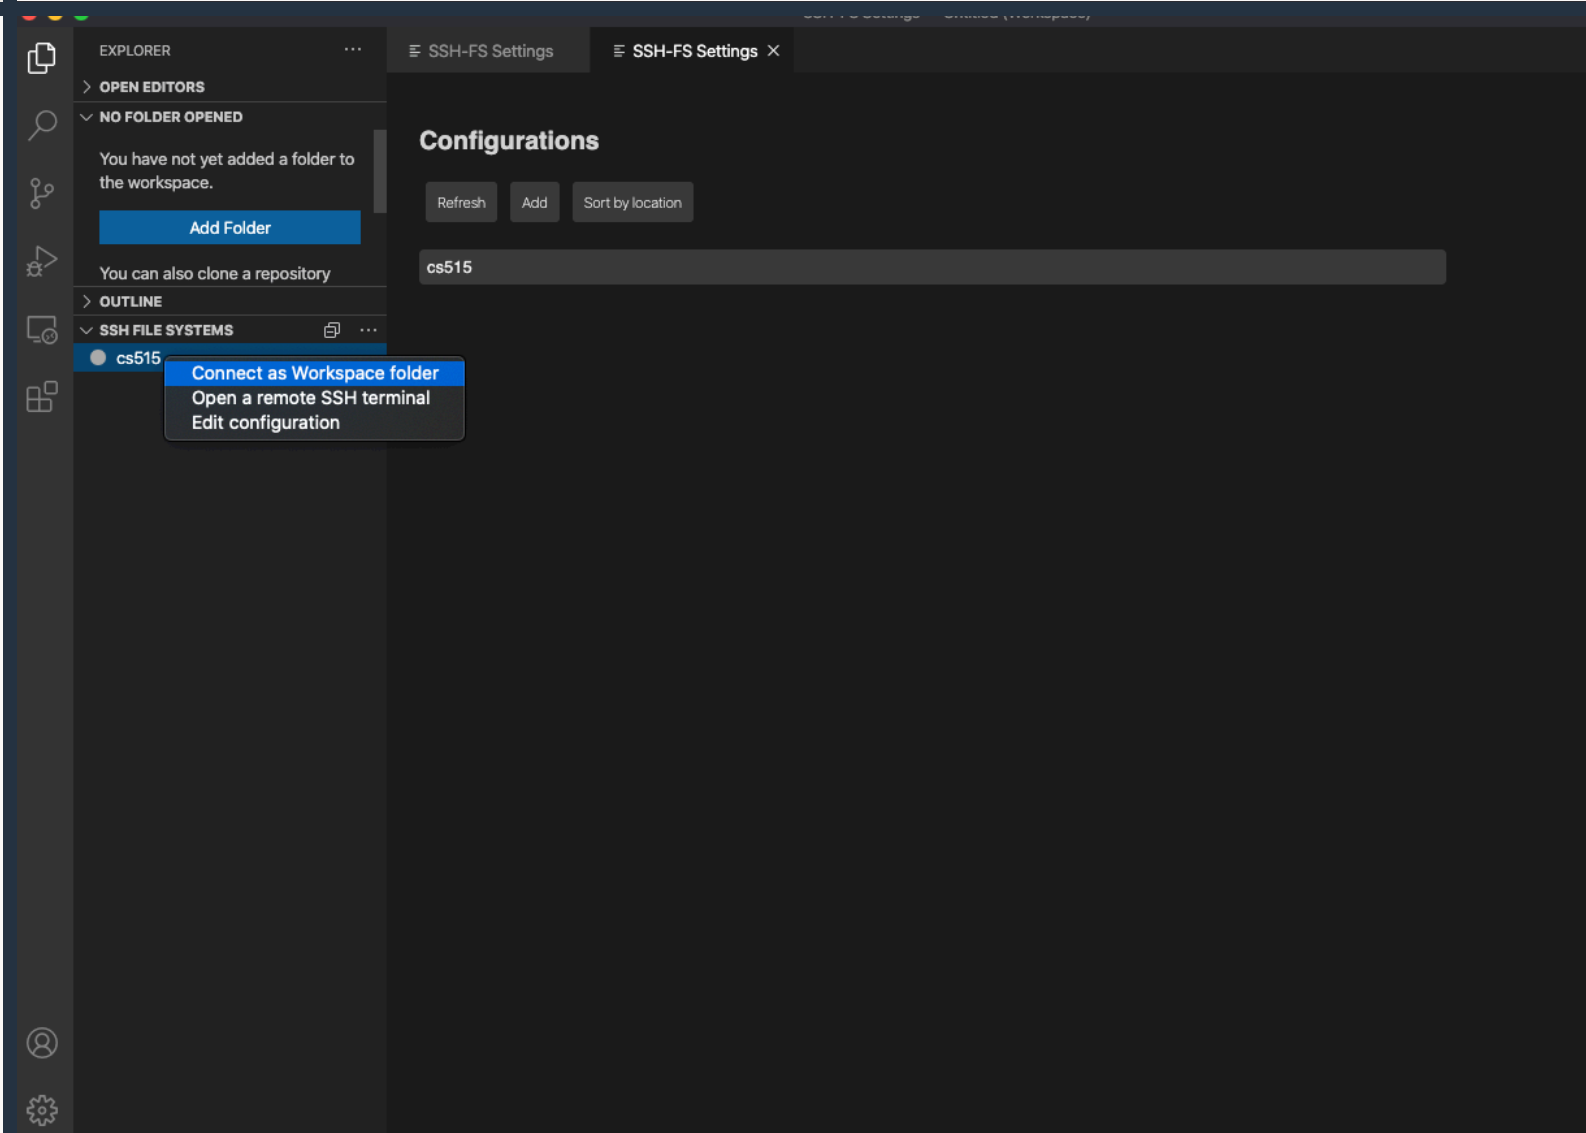

1. Fill up host, root,
username, Password
2. Csg: graduate
students

Csu: the rest
3. port:22/31415

Right click "cs515" and
select "connect as
workspace folder"

When the sign “cs515” turns green, it means it successfully connects to your agate and then click the Terminal bar and open a new terminal.
